

## The first announcement of KOTAC 2015

Dear Colleagues:

This is the first announcement of "the 2015 KOTAC International Conference: Operator Theory and Its Applications" to be held at the [Chungnam National University](#) (Daejeon), in June 18(Thu) - 20(Sat), 2015. The program intends to cover various topics related to Operator Theory and Applications. The conference will give the participants the opportunity to present recent advances in this area. It is our pleasure to invite you to participate and give a talk at this conference. It would be most helpful to have your first reaction **by the 30th of April, 2015**, including a title. There is no conference registration fee. We provide lunches and dinners on the 18th and the 19th (conference days) of June. But all participants should treat their accommodations and other meals by themselves. In the second announcement, we will recommend the Hotel (the room -twin bed- fee per one-night does not exceed 100 US dollars, two people can share a twin room) and reserve the room on behalf of you if you want. And Excursion will be on June 20(Sat), which is an option, and its fee is 100 US dollars. The amount should be paid in the cash at the registration desk of the conference site. For any question concerning KOTAC 2015, please send an e-mail to one of members of the Organizing Committee..

With best regards,
